

TraceGains Product Suite

Plug In. Go Faster.

Automate Your Supply Chain

TraceGains is a supplier compliance, quality management, and NPD cloud platform that helps food, supplement, and CPG companies deliver brand promise. The system digitizes documents and information exchange and uses the data to power dashboards and reports for better business insight. Automatic alerts for regulatory issues and supply chain threats make it easy to manage risk.

On average, our customers find that 80 percent of their suppliers are already in TraceGains Network, allowing them to immediately connect and collaborate. Managing risk is easy with automatic alerts for key ingredients and formulas, and daily system updates on new and emerging supply chain threats and regulatory issues.

The Power of TraceGains Network

TraceGains Network is the collaborative platform where professionals in R&D, procurement, quality, and regulatory departments work with suppliers globally to safely bring new products to market faster. Thousands of supplier locations and hundreds of data sources are combined to identify and qualify new vendors, precisely source raw materials and finished goods, build recipes, negotiate specifications, and automatically collect supporting documentation.

PostOnce™ Technology

- Customers can request documentation from all suppliers with one action.
- Suppliers can submit information, documentation and online forms to all customers at once.

Standard Online Forms

- Based on the best practices of several hundred food and beverage companies and SIDI™ Protocol standards in the supplement industry.
- Suppliers fill out ONCE
 - 68 Standard Industry Document Types
 - 62 PostOnce™ Documents
 - 36 Standard Online Forms

“I explained to the auditor that we use TraceGains. The auditor said he was very familiar with TraceGains and that he didn’t need to question any further. We did really well!”

- Carolyn Kuntz,
Purchasing Agent, Kanpak

Supplier Management

- Streamlines the management of supplier qualification, documents, and relationships.
- Highlights risk by supplier, item, and geography, identifying the most critical threats.
- Ensures businesses are 365 Audit Ready™ cutting audit preparation time from weeks to hours.
- Provides dashboards for allergen, organic, country of origin, nutrition, risk, and other data.

Audit Management

- Automates and streamlines the entire audit process, providing deep insight into facility performance.
- Allows users to schedule, conduct, and track audits on a single platform with any device.
- Provides pre-loaded templates and customization options.
- Tracks the audit process with notifications, workflows, and task assignments, flagging key findings and corrective actions in real-time.

Specification Management

- Allows companies to author, maintain, and publish raw material and finished goods specifications.
- Enables approved suppliers to author or edit specifications, review or add comments, attach documents, negotiate terms, and approve or decline specifications.
- Integrates with existing ERP or PLM systems to automate supplier collaboration and sign off.
- Gives companies a world-class specification management tool without the cost of a full-blown PLM system.

Market Hub

- Connects buyers directly with suppliers to request samples or answer questions.
- Helps create the clean-label products customers now expect from brands they trust.
- Provides geographic mapping capabilities to identify supplier locations, which can help reduce shipping time and cost.
- Speeds up supplier qualification with standardized forms that reduce the administrative burden.

Quality Management

- Helps maintain compliance with FSMA, HACCP, and GFSI, utilizing a centralized repository for safety, SOPs, and quality documentation.
- Provides immediate insight into plant floor and quality operations.
- Enables continuous improvement by digitizing and analyzing all quality data in one system.

Customer Management

- **Basic:** Automates fulfillment of document requests from TraceGains customers through TraceGains Network.
- **Premium:** Enables management of all documents and requests for every customer whether they are a TraceGains customer or not.
- Allows suppliers to manage all customer needs by item, document, or location in a single platform.
- Lets suppliers receive recommended locations from customers.

Supplier Compliance

- Automates lot-by-lot compliance across purchasing, COAs, receiving, testing, and the plant floor.
- Provides scorecards for supplier performance based on continuous specification compliance, CARs/SCARs, and more.
- Tracks issues and complaints across all suppliers that happen on the plant floor, in receiving, or in quality.
- Allows users to quickly and easily issue Corrective Actions and Supplier Corrective Action Requests (CARs/SCARs).

Smart Alerts

- Offers the best source for food and CPG regulatory, safety, incident, and fraud information.
- Integrates hundreds of data sources with a comprehensive taxonomy to deliver precise sourcing fast.
- Enables research by commodity, country of origin, threat type, supplier, date of event, and more.
- Sends automatic alerts for key ingredients and formulas, and daily system updates on new and emerging issues to make it easy to stay current.
